

Final Project Outline – Weeks 3 & 4

Week 3

- Animate the weights displayed
 - Weights show animate their way into view instead of appearing and disappearing in the same location
- Add Set Timer
 - User should have ability to keep track of when they started each set and how long it has been since their last set
- Add Ability to Record a Lift
 - User should be able record a video from the main lift view
 - User should be able to share video of lifts on available platforms with a link to this app in the marketplace and information about the cycle, week, set, lift, weight and reps preloaded to the sharing text
- Add advertisements
 - Banner ads should appear at the bottom of pages where it does not interfere with the content already there

Week 4

- Custom Buttons
 - Add custom button to change between pounds and kilos
- Auto Layout
 - Add constraints so all views appear correctly on both size iPhones
- Finishing Touches/Bug Fixes
- Submit application to marketplace
 - Hope it doesn't get rejected
